

## Subject: 11-speed compatible chain tools FAQ

Date: June 1, 2016 updated

All of Topeak chain tools can extract all the chain pins of 11-spd chains in every brands. The only problem is, Campy requires the end of the connecting rivet to be "peened" to prevent chain failure.

Therefore, the chain tools (All speeds chain tool, LINK11, Tool Monster) that we say : for 11-spd means equipped "rivet anvil" for user to do the "peening" work for Campy's chain.

For Sram & KMC 11-spd chain, after extracting the defected link, the connecting could be fixed by using "master link".

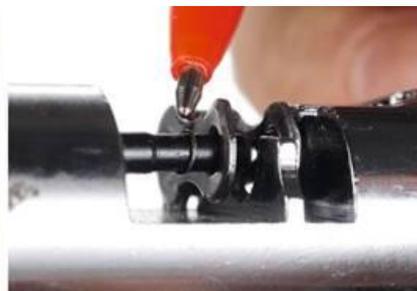

While Shimano, the connecting pin will do the job.

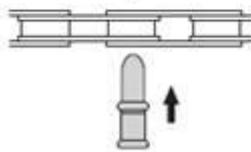

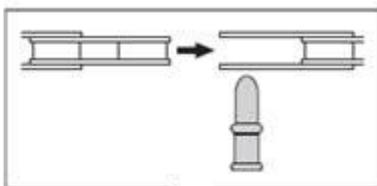

### Connecting Pin for Shimano Chain

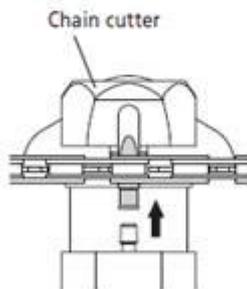

Chain	CN-7801 CN-6600 CN-5600	CN-7800	CN-7701 CN-HG93 CN-HG73 CN-HG53	Others
